

Ignara

Smart LPG Monitoring System

Ignara is an IoT-based LPG gas monitoring system that keeps you and your supplier connected in real time. It easily mounts on any LPG cylinder and connects to Wi-Fi, showing live gas levels, usage trends, and low level alerts ensuring convenience, safety, and smart management for both homes and suppliers.

For Consumers

- Your Gas, Always Under Control
- Real-Time Gas Level Monitoring
- Check your LPG level anytime through the mobile app.
- Low Gas Alerts
- Receive notifications when gas drops below your selected limit (e.g., 20%) – never run out suddenly.
- Usage History & Insights
- Track daily, weekly, and monthly consumption to plan refills and reduce waste.
- Safety First
- Avoid unexpected gas depletion or risky late-night cylinder changes.
- Quick DIY Installation
- Mounts in minutes no technician required.

For LPG Suppliers

- Operate Smarter, Deliver Efficiently
- Next-Day Order Prediction
- Ignara predicts upcoming refill orders based on customer gas levels, helping plan deliveries efficiently.
- Lower Logistics Cost
- Optimize your routes, avoid unnecessary trips, and save on fuel and labor.
- Accurate Inventory Management
- Know exactly how many filled cylinders you'll need tomorrow — reduce overfilling or shortages.
- Customer Satisfaction & Retention
- Offer a premium, smart monitoring service — gain customer trust and loyalty.
- Supplier Dashboard
- Access real-time data of all connected customers, monitor gas levels, and view refill forecasts through an online dashboard.

Key Features

Works with all standard LPG cylinders

- Wi-Fi connectivity with real-time cloud sync
- Mobile App for both user and supplier views
- Battery-powered with long life
- SMS or App Alerts for low-level notifications
- Data analytics dashboard for suppliers

Why Ignara

- ✓ Real-time visibility for both users & suppliers
- ✓ Zero hassle, maximum safety
- ✓ Smarter operations, reduced costs
- ✓ Builds trust through transparency
- ✓ Proudly Made in Pakistan by Innovate-itt

Because Smart Living Deserves Smart Gas Monitoring.
